Art Unit: 2744

Regarding **claim 1**, Ahlberg et al. discloses systems and methods for selectively accepting telephone calls without establishing voice communications wherein a keypad disclosed in figure 2 reads on an input means, controlling means for is disclosed in fig. 2 as item 45 and the associated display item 68.

However, Ahlberg et al. fails to specifically disclose display means for the use of displaying the processing items available for the user.

As to “display means for the use of displaying the processing items available for the user”, it is well known in the art to incorporate display means for the use of displaying the processing items available for the user as taught by Bayless et al.

In the same field of endeavor, Bayless et al. discloses computer telephone system wherein a display means for displaying processing items available to the user relative to a call (Abstract).

Therefore, it would have been obvious to one of ordinary skill at the time the invention was made to modify Ahlberg et al. by specifically disclosing a display means for displaying processing items for the purpose of user friendly communications.

Regarding **claim 2**, Ahlberg et al. and Bayless et al. disclose everything claimed , as applied above (see **claim 1**). In addition, Bayless et al. discloses control means controlling display means to display processing items (fig. 35).

Regarding **claim 3**, Ahlberg et al. and Bayless et al. disclose everything claimed , as applied above (see **claim 2**). In addition, Bayless et al. discloses control means controlling display means to display a list of processing items (fig. 37).

DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 08818564, filed on 3/14/97.

Drawings

2. The drawings are objected to because of failing to comply with the guidelines of 37 CFR 1.84 as specified on attached Form PTO 948. Correction is required.

3. *Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. **Claims 1-3, 6, 17-20, 23, and 34** are rejected under 35 U.S.C. 103(a) as being unpatentable over Ahlberg et al.(U.S. Patent Number 5,657,372) in view of Bayless et al. (U.S. Patent Number 5754636).

Art Unit: 2744

Regarding **claim 6**, Ahlberg et al. and Bayless et al. disclose everything claimed , as applied above (see **claim 2**). In addition, Bayless et al. discloses control means controlling display means to display a combination of processing (fig. 37).

Regarding **claim 17**, the Examiner takes Official Notice that the concept is notoriously well known in the art. It is well known for any type of computer related device to include some pointer means such as a cursor for the purpose of selecting the a displayed item.

6. **Claims 4 and 21** are rejected under 35 U.S.C. 103(a) as being unpatentable over Ahlberg et al.(U.S. Patent Number 5,657,372) in view of Bayless et al. (U.S. Patent Number 5754636) as applied to **claims 3 and 20** above, and further in view of Fujisawa (U.S. Patent Number 5363429).

Regarding claims 4 and 21, Ahlberg et al.(U.S. Patent Number 5,657,372) in view of Bayless et al. disclose everything as claimed above (see claims 3 and 20).

However they fail to disclose control means that will disclose a list of processing items.

As to disclosing a list of processing items, it is well known to display a list of items during call connection of calls as taught by Fujisawa.

In the same field of endeavor, Fujisawa discloses the display of information of the caller as the call comes over the communication lines (see abstract).

Therefore, it would have been obvious to one of ordinary skill in the art to modify Ahlberg et al. in view of Bayless et al. by specifically disclosing a control means for the display of information related to an incoming caller.

Art Unit: 2744

Allowable Subject Matter

7. **Claims 5, 7-16, 22, 24-33** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
